

REVISED POLICY, VOL. 26, NO. 2

IMMUNIZATION

The Board requires that all students be properly immunized against whooping cough, poliomyelitis, measles, diphtheria, rubella (German measles), tetanus, mumps, hepatitis, hepatitis B, and varicella (chicken pox). From time to time other communicable diseases may be designated by the State Board of Health.

The current list of required student immunizations at each grade level is listed in Guideline 5320 - Immunization of Students in School.

The Superintendent shall require parents to furnish to their child's school, no later than the first day of school after enrollment, a written statement of the child's immunization accompanied by a physician's certificate or other documentation. Students whose parents do not provide the required documentation by the opening day of school may be admitted to school provided the documentation is received within twenty (20) days and is in accord with the Superintendent's administrative guidelines on immunization. If the student remains unimmunized at the close of the twenty (20) day period, the Superintendent shall commence expulsion proceedings, unless the parents have filed a religious objection or submitted a physician's statement that the needed immunizations are contra-indicated.

Information concerning meningococcal disease (meningitis) and its vaccine shall be provided to students and parents at the beginning of the school year by the Superintendent. The information must include information concerning the causes, symptoms and spread of meningococcal diseases and places where parents may obtain additional information and vaccinations for their children. The Superintendent shall consult with the State Department of Education and the State Board of Health to develop necessary information and needed materials.

Exemptions to the immunization requirements shall be granted, in accordance with State law, only for medical, religious, or other reasons allowed by the State.

The parent of each female student who is entering grade six (6) shall be provided with information prescribed by the State Department of Health concerning cervical cancer and the human papillomavirus (HPV) infection and that an immunization against the HPV infections is available. Within twenty (20) days after the first day of school, the parent shall provide a written statement as prescribed by the State Department of Health regarding the HPV information.
